**Subject:** laws regarding land clearing for agriculture

Greetings

I am concerned about the laws allowing for runaway land clearing and would like to add my submission. Run off from agriculture pollutes the waterways and in turn the seabed which destroys food sources like kelp, seagrasses and reefs. This affects marine animals small and large alike, turtles and dolphins directly and higher up the food chain indirectly.

Please make and enforce laws that will better protect our land, and in turn, our oceans.

Thanks
