Subject: Ending runaway land clearing.

Why am I being asked to submit vital information, via the Australian marine conservation website, to argue for an end to runaway land clearing?
Is this not self evident?
I urge you all to read..A life on our planet...The latest book from David Attenborough, written during the pandemic. Read the chapter on marine life unravelling,into the near future.
No time for self interest left.
Just care.
How easy is that?
Feel good that you are helping the planet, not hindering it.
